

DRONE PERSPECTIVE LTD

AERIAL INTELLIGENCE. CLEAR DECISIONS.

Professional aerial inspection and imaging services
across South Wales and the UK.

AeroPlan IQ™

Developed by Drone Perspective Ltd

Sky is not the limit – it's just the beginning

AERIAL INTELLIGENCE

Drone Perspective Ltd delivers professional aerial intelligence services for infrastructure, construction, property and commercial clients across the UK.

We combine operational expertise, technical precision and professional reporting with high-resolution aerial imaging providing clear, actionable outputs that support better decisions at every stage of your project.

- Infrastructure inspection & monitoring
- Construction progress monitoring & reporting
- Commercial site intelligence & surveys
- Property & roof inspection services
- CAA Registered | A2 CofC Qualified | Fully Insured

Founded by Toby Rhodes-Matthews, Drone Perspective brings experience in infrastructure reporting, heavy transport route surveying, technical documentation and complex site access planning. That background shapes how we work: safely, commercially and with a clear focus on evidence clients can use.

AERIAL INSPECTION & INFRASTRUCTURE VISIBILITY

Drone Perspective supports infrastructure owners, contractors, consultants and project teams with high-resolution aerial imagery, inspection-grade visual records and practical reporting outputs for hard-to-access assets and operational environments.

Our aerial capability can support visibility across bridges, culverts, retaining walls, highways, rail-adjacent environments, utilities, public buildings, compounds, access routes, drainage corridors and commercial infrastructure sites.

We provide clear visual evidence to help clients understand asset condition, monitor change, support maintenance planning, strengthen reporting and identify where further specialist review may be required.

- Safe access to hazardous or hard-to-reach assets
- High-resolution defect identification & condition survey
- Reduced downtime vs traditional access methods
- Geotagged imagery with annotated inspection reports
- Bridges, pylons, telecoms masts & industrial structures

Powered by AeroPlan IQ™

Drone Perspective is powered by AeroPlan IQ™, one of the UK's first dedicated drone planning and operational evidence platforms, developed by Drone Perspective Ltd. It strengthens how we plan, assess, record and evidence each job, supporting structured checks, RAMS preparation, site survey records and professional operation packs.

Introducing AeroPlan IQ

AeroPlan IQ™ is Drone Perspective's UK-built planning and operational evidence platform, designed to support professional drone operations from initial site review through to final job records.

It helps structure the way we plan, assess, record and evidence each operation by supporting pre-flight checks, airspace and weather awareness, RAMS preparation, site survey records, operation packs and retained project evidence.

For clients, this means a more controlled, consistent and auditable approach to drone work — strengthening safety, compliance, reporting quality and confidence in the outputs we deliver.

AeroPlan IQ™

PLANNING WORKSPACE

Build the planning evidence trail

Review the current operating area, save the job plan, then link it into an Operation Pack for RAMS, site survey and briefing evidence.

Plan
 Select area and review planning inputs

Save Job Plan
 Record the planning snapshot

Site Survey
 Capture site-specific evidence

Operation Pack
 Link plan, survey and RAMS

SUBSCRIPTION

CONSTRUCTION PROGRESS MONITORING

Drone Perspective Ltd delivers systematic aerial documentation of construction sites, providing project managers, developers and stakeholders with accurate, timestamped visual evidence of site progress throughout every phase of the build.

Our high-resolution aerial imaging creates an objective, repeatable record that supports programme management, dispute resolution and client reporting with clarity and precision.

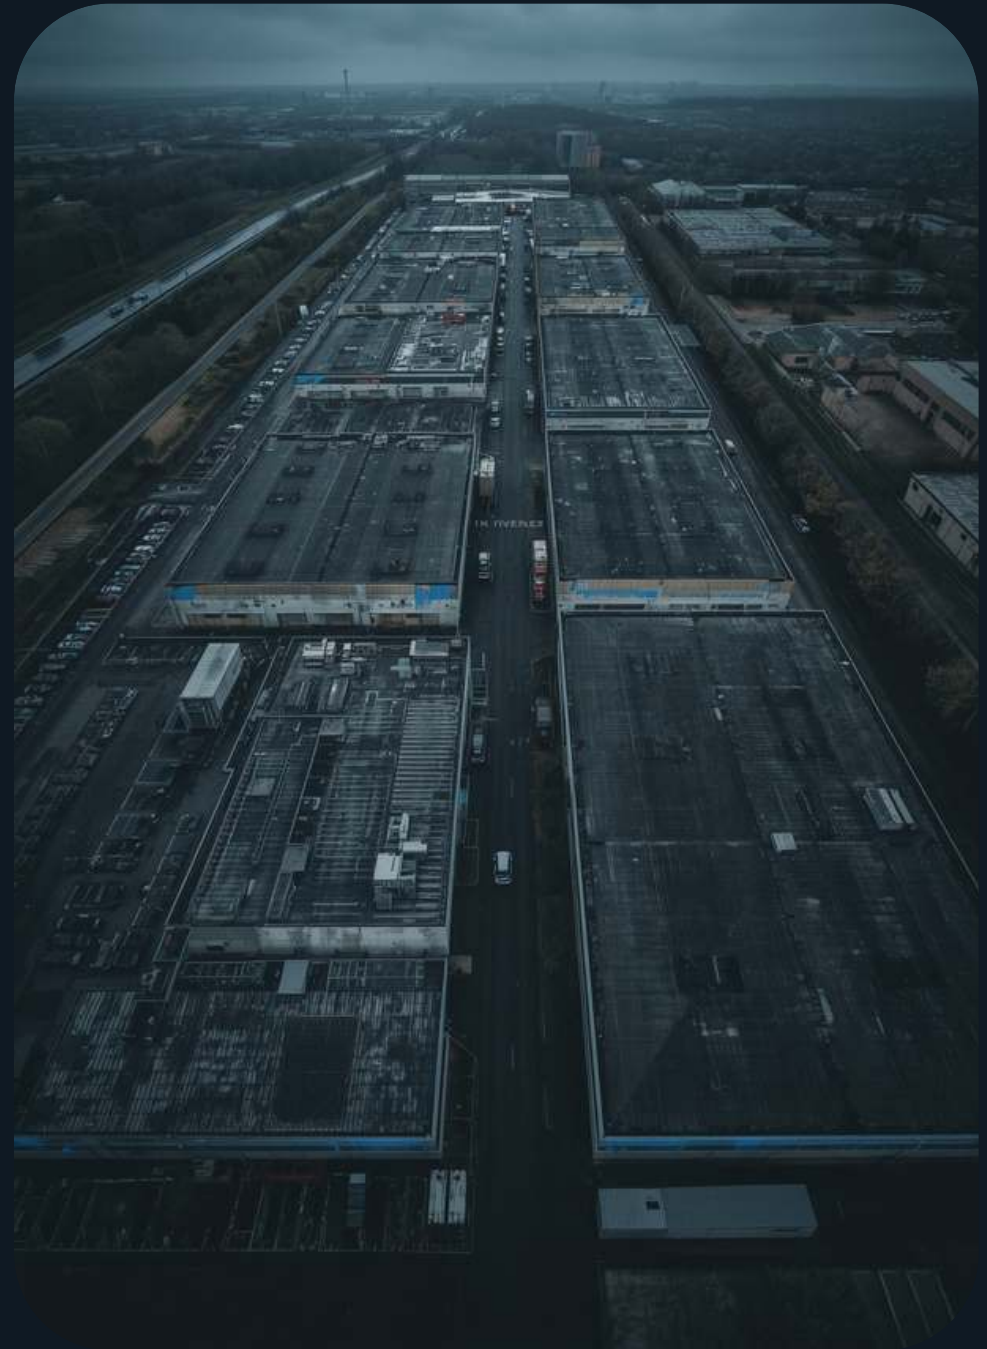

- Regular site documentation and timeline tracking
- Stakeholder-ready progress reporting
- Scheduled fly-throughs aligned to programme milestones
- Visual evidence for contract and dispute records
- Comparative before/after site imagery and reporting

COMMERCIAL SITE INTELLIGENCE

Drone Perspective Ltd delivers precision aerial intelligence across retail parks, industrial estates, logistics hubs and commercial property portfolios. Our high-resolution aerial surveys provide asset managers, developers and occupiers with actionable data to support planning, maintenance and operational decisions. From large-scale commercial sites to multi-unit logistics facilities, we provide consistent, repeatable aerial coverage that reduces survey costs and accelerates reporting timelines.

- Retail park and industrial estate aerial surveys
- Logistics hub and warehouse assessments
- Multi-site portfolio coverage and reporting
- Commercial property condition intelligence
- Procurement-ready outputs and asset documentation

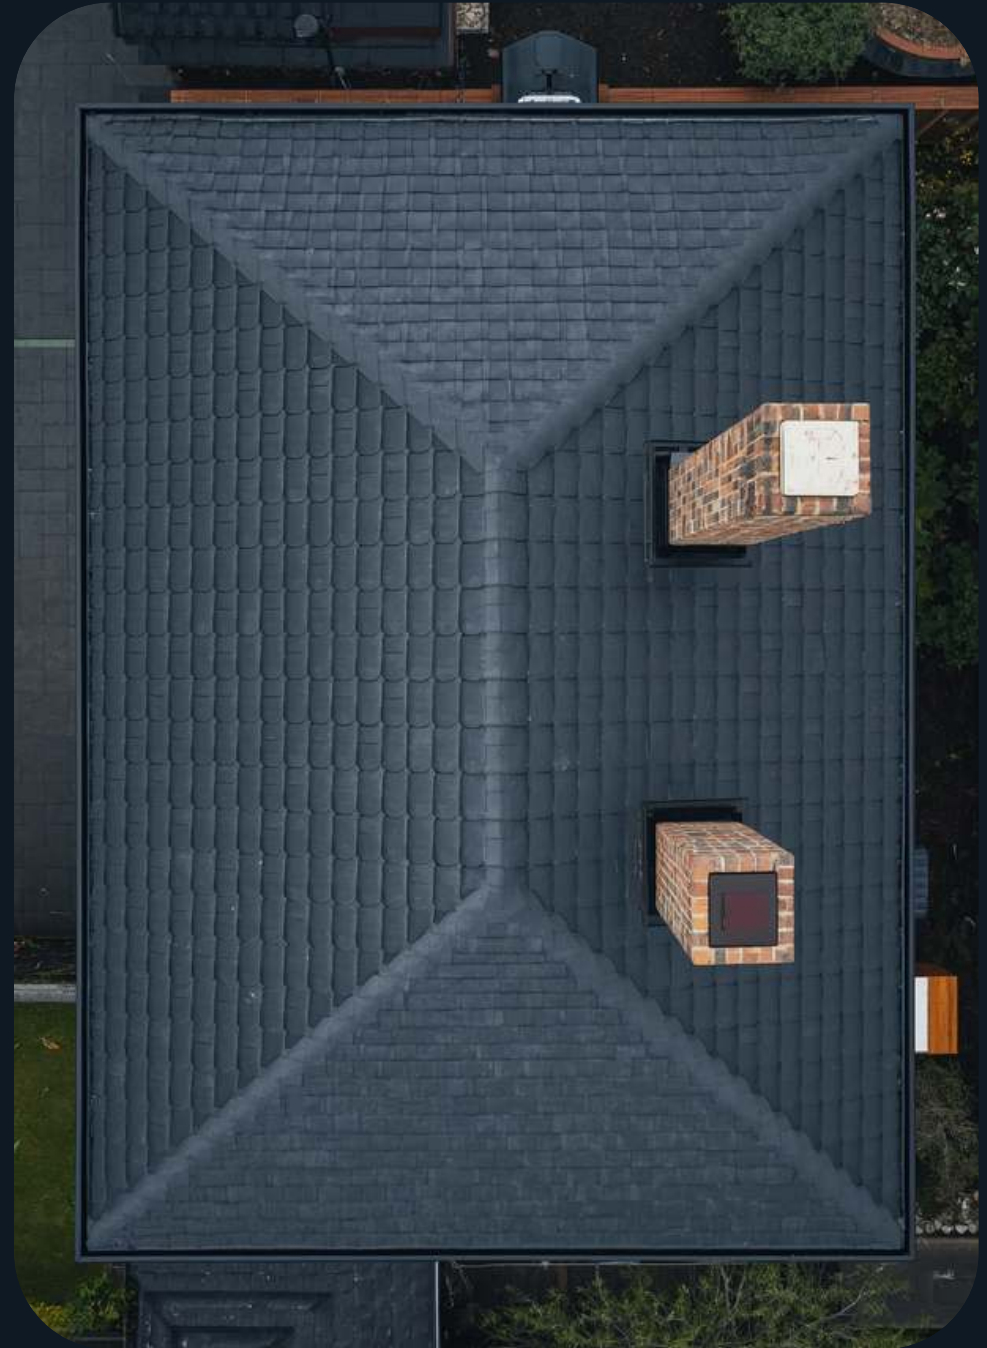

ROOF & PROPERTY INSPECTIONS

Drone Perspective Ltd delivers high-resolution aerial inspection services for residential and commercial properties across the UK. Our UAV-mounted imaging systems capture detailed condition data from rooftops, facades and structures — safely, efficiently and without scaffolding or access platforms.

From routine maintenance surveys to insurance documentation and pre-purchase condition assessments, we provide clear, evidence-based reporting that supports informed property decisions.

- Residential rooftop surveys and condition reports
- Insurance documentation and claims evidence
- Pre-purchase property condition assessments
- Maintenance planning and defect mapping
- Safe access without scaffolding or platforms

PROPERTY MARKETING

Drone Perspective Ltd delivers premium aerial content for property agents, developers and housebuilders across the UK. Our aerial photography and video production transforms how properties are presented to market — creating compelling, high-resolution visuals that drive buyer engagement and accelerate sales.

From boutique residential listings to large-scale development schemes, we provide a full suite of aerial marketing content tailored to the needs of property professionals.

- Aerial photography for residential & commercial listings
- 4K HD video production & editing
- Development progress & site context imagery
- Agent & developer content packages
- Virtual tour support & promotional media

OUR PROCESS

Every project is delivered through a structured, repeatable methodology — designed to minimise risk, maximise data quality and ensure outputs are actionable from day one.

From initial consultation through to final deliverable, our workflow is built around client objectives, regulatory compliance and operational precision.

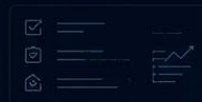

- 01 — Consultation
Scope definition, site assessment and objective alignment
- 02 — Flight Planning
Regulatory clearance, risk assessment and airspace coordination
- 03 — Data Capture
Precision aerial operations using 4K HD and thermal imaging
- 04 — Processing
Data analysis, georeferencing and technical reporting
- 05 — Deliverables
Structured outputs, annotated reports and client briefing

Clearer flight decisions.

Stronger operational evidence.

Planning and decision-support
for professional drone operations.

CAPABILITY MATRIX

Sensors: 4K RGB | 48MP still | thermal IR | LiDAR

Outputs: orthomosaics, point clouds, 3D models

Deliverables: PDF reports, GeoTIFF, DXF, MP4, KMZ

Accuracy: survey-grade GCP-corrected data

Our aerial intelligence platform is built on professional-grade equipment, calibrated sensors and structured data workflows delivering precise, actionable outputs for infrastructure, construction, property and commercial clients.

Every deployment is matched to client requirements, with sensor selection, flight parameters and output formats agreed prior to mobilisation to ensure data integrity and reporting accuracy.

Inspection & Imaging

High-resolution aerial visuals for roofs, elevations, assets and hard-to-access areas.

Software & Evidence

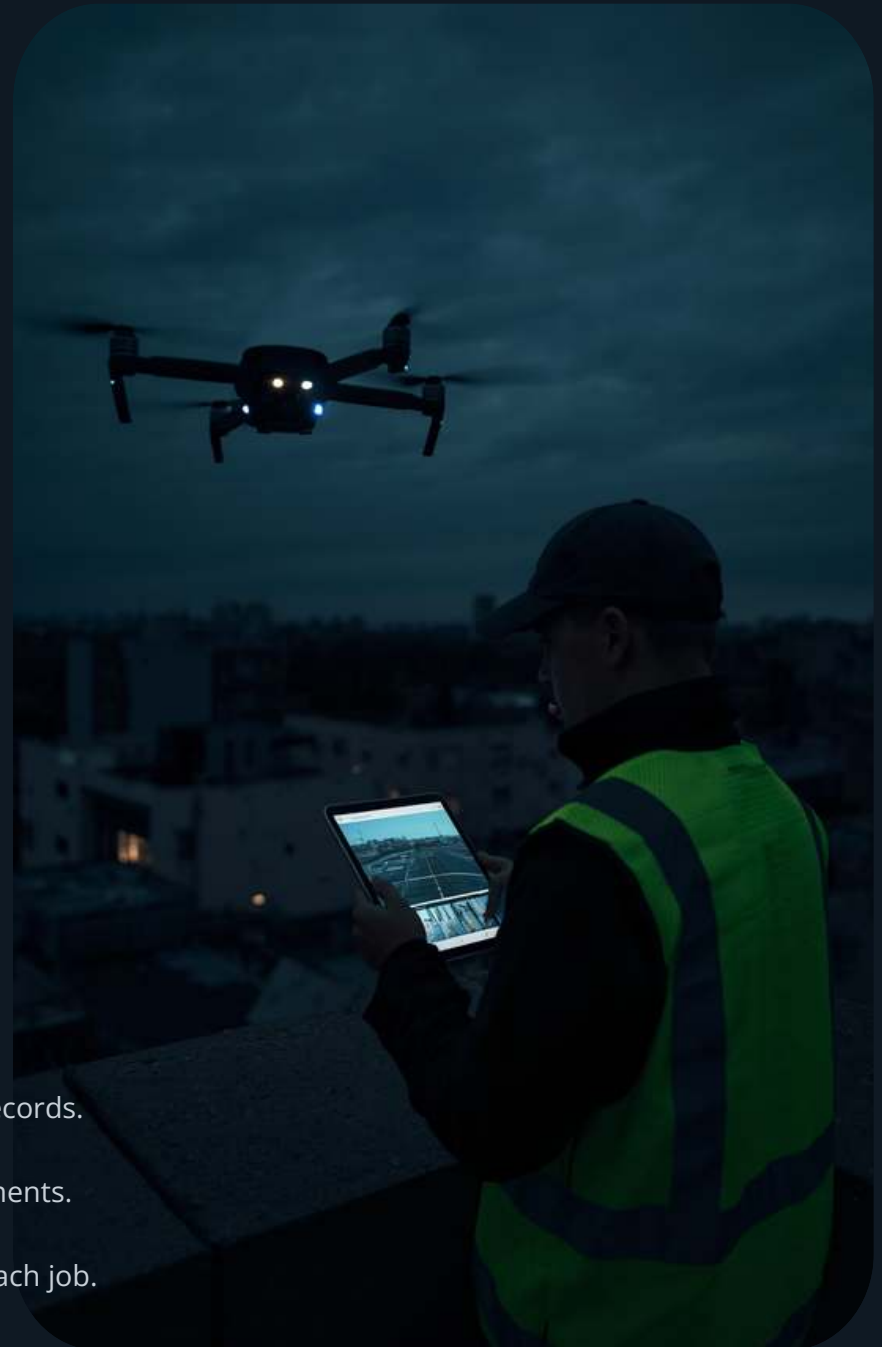

Powered by AeroPlan IQ™ to support planning, RAMS, site surveys and operation records.

Site Access Capability

Suitable for urban, industrial, rural, remote and operationally constrained environments.

Operational Control

Airspace, weather, site risk, take-off/landing and public interface checks built into each job.

SUPPLIER ASSURANCE

Drone Perspective Ltd meets the compliance and assurance standards required for procurement across public sector, infrastructure and commercial frameworks.

We hold all required Civil Aviation Authority registrations and operator qualifications, carry comprehensive commercial liability insurance, and operate under documented safety management and quality procedures — providing clients with the confidence to instruct with minimal procurement risk.

- CAA Registered Operator — GVC qualified
- A2 Certificate of Competency (A2 CofC)
- Fully insured with commercial & aviation liability cover
- Documented safety management system
- Procurement-ready credentials and reporting

PROVEN RESULTS

Our work speaks through measurable outcomes. Across infrastructure, construction and commercial sectors, Drone Perspective has delivered actionable aerial intelligence that drives decisions, reduces risk and accelerates project delivery.

Every engagement is supported by structured reporting, compliant operations and evidence-led outputs trusted by project managers, asset owners and procurement teams across the UK.

- Infrastructure inspection completed 60% faster than traditional access methods
- Construction progress reports delivered within 24 hours of each site visit
- Commercial property surveys across multi-site portfolios coordinated and delivered on schedule
- Zero reportable safety incidents across all operational deployments to date

Sky is not the limit - it's the beginning
